SkyLight LED Curing Light
with QuickView Display
The SkyLight LED Curing Light: Powerful, Fast and Easy to Use

"With so many curing lights on the market, each offering a specific feature or features, it is often difficult to choose the right one. When it comes to choosing a light that is small, powerful and ergonomically balanced, SurgiTel’s SkyLight LED Curing Light is the answer!"

Howard S. Glazer, DDS, FAGD

The SkyLight™ LED Curing Light is powerful, fast, and easy to use. It’s portable, programmable and has a cure time as fast as 5 seconds*!

*depending on the material and thickness

This unique design has all the advanced features of the latest LED curing lights with a modern design that is user-friendly and less fatiguing on your hand compared to other curing lights.

A large “Quick-View” display screen, built into the hand piece, allows for immediate and simple access to curing times and modes.

The SkyLight™ has been ergonomically designed to fit comfortably in the palm of your hand. In addition, a rotating light guide was added to provide control in and around the oral cavity without the potential discomfort of typical finger-hold pen/wand lights.

With the combined speed, comfort, and reliability one expects from a curing light, it’s easy to see why the SkyLight™ is the only choice for outstanding dentists.

Curing Modes

![Curing Modes Diagram](image-url)
Easy to View, Comfortable to Grip

**Turbo Light Guide**
with easy sterilization and 360-degree rotation

**QuickView Display**
for easy program viewing

**Easy Programmable**
5-program storage

**Radiometer**
on charger base
360 curing cycles

**5-10 Second Curing Time**
High Intensity power = 1,000 mw/cm²
Wavelength range = 440-490 nm
Efficient for bracket bonding curing

**Lightweight Lithium-Ion Battery**
2-hour charge time

**ComfortGrip Cordless**
unit that prevents hand fatigue

**Accessories**

- **Power supply**
  AC 100-240V, 50/60Hz
  Consistent power output

- **Radiometer**
on charger base
  360 curing cycles

- **Multiple Light Guides**
  available in 2mm, 8mm or 11mm

- **UV Filters**
  available in large and small
